

Assignment 3: Keyboard Control

- 1) Using what you know from the previous lessons, find and assemble the following commands so that your script looks like the picture below:

Look for this command in the

Control

command group. You can select which keyboard button to press in the drop-down list.

You can make any key do whatever you wish! Play around and see what you can do.

- 2) Save your assignment as “3-Keyboard”

Challenge:

- 1) Add a key press that will let you make the pen size bigger. Add a different key press that will let you make the pen size smaller.
- 2) Add a key to change Scratch's size. Add another key to make Scratch smaller.
